

```
public static int sumArray(int[] array) {  
    int result = 0;  
    for (int i = 0; i < array.length; i++) {  
        result = result + array[i];  
    }  
    return result;  
}
```

A network diagram is overlaid on the code. It consists of several nodes represented by colored circles: purple, grey, yellow, pink, and orange. Lines connect these nodes, forming a complex web. Some lines are straight, while others are curved. The nodes are distributed across the image, with some appearing to be connected to specific lines of code, such as the 'for' loop and the 'return' statement.
