

```
public static int hIndex(int[] numbers) {  
    Arrays.sort(numbers);  
  
    for (int i = 0; i < numbers.length; i++) {  
        int current = numbers[i];  
        if (numbers[i] >= current) {  
            hIndex = current;  
        } else {  
            break;  
        }  
    }  
    return hIndex;  
}
```
