```
public static int lengthOfLastWord(String text) {
   int length 0;
    boolean islastWord = false;
              et.len() - 1; i >= 0; i--) {
    for
        char c = text.charAt(i);
        if (c >= 'a' && c <= 'z') || (c >= 'A' && c <= 'Z')) {
           isLastWord = true;
           length++;
        else
           if (isLastWord) {
               break;
   return length;
}
```
