```
static List<Integer> sort(int a, int b, int c, int d) {
        (a > b) {
        int temp = b;
         = temp;
          > d) {
          t temp = d;
        d = c;
          = temp;
        a > c) {
        int temp = c;
        c = a;
        a = temp;
            d) {
           temp = d;
        d \( b;
        b =\temp;
       (b > c) {
        int temp = c;
            temp:
    return Arrays.asList(a, b, c, d);
}
```
