```java
public static int ackermann(int n, int m) {
    if (n == 0) {
        return m + 1;
    } else if (m == 0) {
        return ackermann(n - 1, 1);
    }

    return ackermann(n - 1, ackermann(n, m - 1));
}
```
